CHECK POINT™

Infinity

Protect Local Government Services & Data

Prevention-First Consolidated Cyber Security

Local governments are prime targets of Hacktivism, with a 20% increase in attacks every year, averaging 1,564 attacks a week, costing the public sector an estimated $2M per data breach.

Check Point Infinity prevents cyber threats against your local government data and services with a unified security architecture to protect the entire IT estate. This prevention-first consolidated, security suite complies with industry regulations (e.g., PCI DSS) and protects networks, cloud, mobiles, endpoints, and IoT devices against advanced cyber threats. Scalable to fit your needs and budget, with proven success at hundreds of local governments.

Comprehensive

Comprehensive prevention to secure government and citizen data

Collaborative

Prevent known and zero-day attacks with collaborative threat intelligence

Consolidated

Consolidated security solution offering the highest operational efficiency and cost-saving

Infinity consolidated cyber security offers:

- Industry's best Threat Prevention technologies - 99.7% Zero-Day threats blocked.
- Full coverage & incident correlation across the entire security estate.
- Simplified management and security operations.
- Improved operational efficiency & reduced security operational costs.
- Real-time threat intelligence with ThreatCloud AI.
- Simple licensing - comprehensive threat prevention in a simple all-inclusive, yearly subscription.

CHECK POINT™

Secure devices, emails & collaboration apps

Prevent phishing, malware, and ransomware attacks across email, browsers, and business applications with zero-trust security for the remote workforce:

- Email and productivity suite security (Office 365, G Suite)
- Mobile, Endpoint, and Browser protection
- Secure Access Service Edge (SASE)

Secure data & digital services

Stop attacks on websites and digital services with secure integration to third-party applications. Zero-trust access in compliance with data regulations:

- Web application & API Security
- Secure the cloud and on-prem applications
- Centralized management with consistent policies

Protect critical public infrastructures

Safeguard critical infrastructure and emergency services against hacktivists and threat actors. Ensure operational continuity by leveraging:

- IoT and grid system security
- Network and VPN protection on all connected assets
- 24/7 SOC access to Check Point's cyber defense team

Reduce TCO & increase operational efficiency

Infinity is a consolidated security suite offered under a single license, which can be scaled to fit any state government or municipality's unique security needs. The solution offers preemptive protection against advanced attacks and delivers an average 47% increase in operational efficiency and an average 20% reduction in security costs.

Software + Hardware + Security Services + Support = Subscription
